

EVM-DDSM

Door Detector

Product Information:

A magnetic contact is an essential component of security systems used to monitor the status of doors and windows. It consists of two main parts:

- **Magnet:** Installed on the moving part (e.g., door or window).
- **Sensor:** Mounted on the fixed frame to detect changes in the magnetic field.

Technical Properties

Contact Form	SPST
Contact Type	Normally Closed(NC)

Operational Properties

Pull-in Gap	42mm
-------------	------

Physical Properties

Connections	Side entry with spiral-wound metal cable protection
Material	Metal body
Switch/Magnet Dimensions	50 x 10 x 17 mm
Color	Metallic

EPN	DESCRIPTION
EVM-DDSM	Magnetic contact
