

26.01.23

Announcement of Product Change

Dear Valued Customer,

This letter informs you of an upcoming change for select field attachable valve connectors purchased by your organization.

This change will allow improvements for the following:

- Newer Technology

We ask that you review this letter to ensure that you understand the details of this change.

PCN No: PCN-2023-26-01

Customer: All customers

Change Title: Legacy GDM "J" Type

Product Category: Valve

Change Classification: _____ Minor Major

Change Item: Design ___ Raw Material ___ Packaging ___ Firmware ___ Others

Reason:

The change is to streamline production capabilities to improve the delivery of all field attachable valve connectors, including Form A, B, and C. The generation 2 contact bearer is at end-of-life. Due to limited machine capacities available for all types, we will no longer support two generations of contact carriers in operations.

Change Description:

The scope of this change will include updating all bills of materials for affected products and changing from G2 contact barrier to G3 contact barrier. The agency approval documentation will be edited or requalified to reflect the PCN.

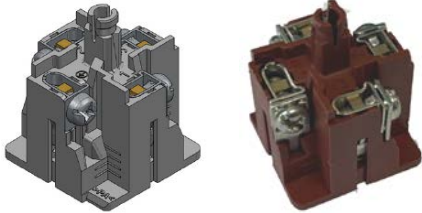

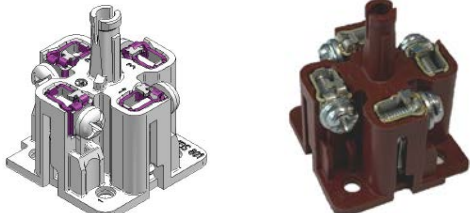

Implementation Plan:

Orders received on or after April 3, 2023

Impact of Change:

We anticipate little to no impact on customer applications. Customers adding components such as function indication or suppression components will need to consider this change in detail due to the contact design for G3. The contacts design for G3 heats up faster for soldering/welding components. Adjustments to your internal production steps may need to reflect the change.

Fit: No change | **Form:** Yes | **Function:** No change | **Reliability:** Improved | **Others:** Product information
