

## WLC High Availability Clustering Option

### General Data

Name	WLC High Availability Clustering Option
Availability	Pre-Installed on WLCs or delivery on request
Order Number	on request
Type	Software License
Short Description	Central management and convenient configuration alignment of several WLAN controllers.
Long Description	Multiple WLAN controllers are grouped into one highly available device group. In this way, configuration changes, features and enhancements made on one WLC are automatically transferred between the other WLCs in the cluster: Not having to make manual changes on each individual device means massive time savings for administrators. - Comfortable administration of cluster devices like one single device - Allows the grouping of up to 10 WLAN controllers to one device cluster
Country of origin	Germany
Warranty	5 years
Scope of Delviery	1x License Key for one WLC (at least 2 required for a Cluster)

### Scope of functionality

Config Sync	Automatic Configuration Alignment Due to the grouping of several individual devices to one device group (cluster), configuration changes conducted for one device can be automatically synchronized with all cluster devices, without having to manage each device manually (Config Sync).
