

Product: [CSM310-C](#) 

Central Switching Module with MPLS-TP compliant switching fabric for Aggregation nodes

Product Description

The CSM310-C Central Switching module (=CSM) is the heart of the XTran nodes. This module provides the main processing within the XTran nodes via an Integrated Ethernet Multilayer Switch and onboard Traffic Manager. The CSM310-C must be plugged into a CSM slot in the aggregation nodes. The CSM provides the ability to use 10Gbps enable ports, a switching capacity of 64Gbps and makes use of a Stratum 3 clock.
